Monstera

Monstera deliciosa

Drama Queen, holes included.

Description

Grows a new leaf and tells everyone about it.

It wants a bright spot with a curtain between it and the sun. A weekly drink keeps it happy.

Care facts

Light	Bright indirect
Watering	Weekly
Care level	Easy
Holiday tolerance	1 week
Pet safe	No
Typical height	150 cm
Pot diameter	30 cm

Care tips

Watering. Water when the top 3 to 4 cm of soil are dry, about once a week. Empty the saucer after watering.

Light. Bright light without direct sun. Too little light gives small leaves with few splits.

Feeding and repotting. Feed every 2 to 4 weeks from spring to summer. Repot every 2 years. Give it a moss pole for the aerial roots.

Watch out for. Yellow leaves mean too much water. Brown tips mean dry air. Wipe the big leaves now and then to keep dust off.

About this plant

- Monstera deliciosa is a flowering plant species.
- Its natural range includes tropical forests of southern Mexico, south to Panama.
