Pothos

Epipremnum aureum

Forgives everything, including you.

Description

Trails down the shelf and never complains about the view.

It likes a bright room, just not direct sun. A weekly drink keeps it happy.

Care facts

Light	Partial shade
Watering	Weekly
Care level	Unkillable
Holiday tolerance	3+ weeks
Pet safe	No
Typical height	200 cm
Pot diameter	14 cm

Care tips

Watering. Water about once a week. Let the top few centimetres of soil dry out first. Droopy leaves tell you it is thirsty.

Light. It copes with partial shade. Brighter light gives faster growth and a fuller look. Avoid hard midday sun.

Feeding and repotting. Feed every 4 weeks in spring and summer. Repot when roots fill the pot. The long vines can simply hang down.

Watch out for. Yellow leaves usually mean too much water. Brown tips mean dry air or irregular watering. Trim vines to keep it bushy.

About this plant

- Epipremnum aureum is a plant taxon.
- Its natural range includes Mo'orea in the Society Islands of French Polynesia.
